CAREER OBJECTIVE

Data Science student and web developer with hands-on experience in Python, machine learning, and full-stack development. I build data-driven applications and deliver live client websites, combining analytical thinking with clean, responsive design. Seeking an internship or junior role at a forward-thinking organization where I can apply my skills, keep learning, and grow into a skilled data professional.

EDUCATION

2025 – Expected 2029
BACHELOR OF SCIENCE (BS) IN DATA SCIENCE, SIR SYED UNIVERSITY OF ENGINEERING & TECHNOLOGY, KARACHI

2023 – 2026
DIPLOMA IN INFORMATION TECHNOLOGY (DIT), SINDH BOARD OF TECHNICAL EDUCATION (SBTE), KARACHI

2023 – 2025
INTERMEDIATE (Computer Science), PNG SECONDARY HIGHER SCHOOL, ZIAUDDIN BOARD

2021 – 2023
MATRIC (Science), ST. FRANCIS SECONDARY SCHOOL

EXPERIENCE

2025
Sales Calling Agent, US CAMPAIGN – SALES DEPARTMENT

Key Responsibilities

- Communicated professionally with US-based customers to promote company services and generate leads.
- Maintained accurate customer records and follow-up schedules.
- Resolved customer queries effectively and consistently met targets in a fast-paced, target-driven environment.

PROJECTS

2025 – 2026
Freelance Web Development – Client Websites (Live)

- **Stanley Paden – Official Author Website:** Designed and deployed a responsive website for an award-winning sci-fi author to showcase his books. stanlyepaden-snowy.vercel.app
- **Adam of Dadam – Children's Book Website:** Built a story-driven landing site for the children's book *Commander Adam and the Spaceship*. adamofdadam.vercel.app
- **Luke Young – Civic Movement Website:** Developed a website for a political reform and public accountability movement. luke-young-mai.vercel.app
- **Tech:** React JS, Responsive Design, Vercel deployment.

2025
Interactive Data Mining & Machine Learning System

- Built a Python application that lets users upload datasets and run machine learning tasks through a friendly interface.
- **Features:** data cleaning & preprocessing, classification, clustering, regression, model training & evaluation, data visualization.
- **Tech:** Python, Pandas, NumPy, Scikit-learn, Matplotlib.

2026
RPG Battle Arena – GUI-Based Game

- Designed and developed a GUI RPG game demonstrating core Object-Oriented Programming concepts.
- **Features:** character selection, enemy battle system, health management, attack & special attacks, score tracking, restart/game over.
- **OOP applied:** encapsulation, inheritance, polymorphism, abstraction. **Tech:** Python, Tkinter.

SKILLS

Data Science & AI: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Machine Learning, SQL, MySQL
Web Development: HTML5, CSS3, JavaScript, React.js, PHP, REST APIs, WordPress, Elementor, Responsive Web Design, UI/UX Design
Programming: Python, Java, C#, Kotlin, Object-Oriented Programming (OOP), Software Development
Mobile & Tools: Android Studio, Mobile App Development, Qt Designer, Git & GitHub, VS Code, VMware, phpMyAdmin
Other: Graphic Design, Digital Marketing, Quality Assurance, Documentation, Report Writing
Soft Skills: Communication, Presentation, Problem Solving, Team Collaboration, Time Management, Quick Learner
